The Redwood City
Implant study club
is a CE program
provided by
Ihab M Hanna DDS,
as A to Z Implant training
for the General dentist.

About the facilitator

Dr. Ihab M. Hanna graduated, with honors, in 1994 from Cairo University. Afterwards, he spent three years in training and residency before moving to Chicago where he completed two years of general practice residency at the University of Illinois with a superb group of fine dental implantologists. He acquired additional training to incorporate dental implants, sedation and special care dentistry in his private practice.

In his 12 years of general practice, Dr Hanna developed the skills to perform the surgical as well as the restorative aspects of dental implants confidently.

Dr Hanna has reached such comfort and confidence in the field of implant dentistry as a general dentist, and his goal is to help his colleagues to reach the same confidence by sharing his knowledge with them .

Course Outline
